

JOON DONG

(647) 529 5025 · Toronto, ON

 joon.d10@outlook.com ·  www.linkedin.com/in/joon-dong ·  joond10 (github.com)

HIGHLIGHT OF QUALIFICATIONS

- Proactively seek out resources for learning opportunities to develop programming skills
- Well-versed in object-oriented programming concepts making skills transferable across languages
- Consistently solidify understanding of concepts through practical application with projects
- Excellent communication and interpersonal skills with leadership over personal development

TECHNICAL SKILLS

Languages & Tools: C/C++, Java, JavaScript/HTML/CSS, SQL/Oracle, Git/Github

Currently Learning: Node.js, MongoDB, UML

PROJECTS

Pokésortify | JS/HTML/CSS | [joond10/pokesortify \(github.com\)](https://github.com/joond10/pokesortify)

- Utilized the Fetch API to retrieve various data from the PokeAPI such as types, descriptions, and images
- Handled and manipulated JSON data to generate dynamically styled cards with CSS flexbox
- Implemented sorting functionality for dynamic cards enhancing user interaction and browsing

DUEL! | JS/HTML/CSS | [joond10/turnbased-rpg \(github.com\)](https://github.com/joond10/turnbased-rpg)

- Employed DOM manipulation with JavaScript such as *setTimeout* to replicate animated sequences
- Utilized attributes such as *hidden* to manage visibility of elements based on user action
- Calculated and styled a dynamic health bar which changes accordingly upon taking damage

Typing Speed | Java | [joond10/typing-speed \(github.com\)](https://github.com/joond10/typing-speed)

- Applied polymorphic behavior to build a typing speed application offering different difficulty settings
- Managed arrays of word banks to determine what the user entered and if it matches correct words
- Processed and displayed data such as WPM and number of correct words entered

EMPLOYMENT EXPERIENCE
